about the group project this is what i think, so we will create a program to data the whereabout of UTM student, staff or lecturer

Okay ..

12:16 am ✓✓

we can implement inheritance in deciding Students, Staff, or Lecturer.
then aggregation for student hostel/kolej, and composition for their course

12:16 am

maybe we can expand more later 12:17 am

but .. do you remember that madam told us to do the project in accordance with the theme? ..

12:17 am ✓✓

yeah the theme is Ccovid 19 right ? 12:18 am

Yes. 12:18 am ✓✓

and now UTM also need to data whereabout their student

12:18 am

during this online learning 12:18 am

they even give us gform to fill in 12:18 am

so why not use it as an ide

we shall use the data obtained from the Google Form to create a system right? ..
12:19 am

yup 12:19 am

we can use that 12:19 am

a system that could store and track the whereabouts of the students and staffs ..

First draft of the project

Each group needs to upload the softcopy of the progress of your project (first draft). The softcopy must include the following items:
1) The description of your project such as introduction to the system, objectives and scopes of the system, and the purposes or significance of the system.
2) The flow chart/ workflow of the proposed system
3) The UML class diagram
4) Task distribution
5) Any other items related to project if any such as source codes, use case diagram etc.

Can you do number 1, 4, and the evidence
10:11 am

I'm gonna do the Message deleted

I don't know about the flowchart but i think i can do it too
10:11 am

Since i'm the one who is making the "menu" cpp
10:11 am

So i think it's okay   10:11 am

And then we can check the UML again, if it can be improve then we'll improve it   10:12 am

Or we can continue to code it   10:12 am

Oh and can u also do the header if we decided to use this one
10:12 am

Okay, bro ..
the evidence meas - no. 5? ..   10:13 am

Yeah we have those 2:39 pm

But i forgot to add it hahaha 2:39 pm

like using the ID or something and recall the
stored data.
2:39 pm ✓✓

Maybe in the second submission se can add
it

I do have the vision to add this 2:39 pm

I just forgot to do it when i'm making the
code
2:39 pm

oouuhh .. which means, our system able to
recall the data that been stored via search
function right? ..
2:39 pm ✓✓

Yup 2:40 pm

But the data must exist firat 2:40 pm

First 2:40 pm

So either they must be inputted or read
2:40 pm

nope

5:24 pm

this is still purely our own design   5:24 pm

oh we refer to an old exercise that the dr gave us

5:25 pm

does that count ?   5:25 pm

> **Muhd Hafizh Herti Arrabbani**

that could be so.
because that's our reference.   5:29 pm ✓✓

Hmm we use it for the reference for the menu

5:30 pm

Xyzstore   5:30 pm

so .. as we still haven't any related item (su
as the Google form) ..
we can use that code for that purpose
